Portfolio

Summary

Results-driven Business and Data Analyst with 3+ years of experience in data analytics, market research, process optimisation, and delivering AI-powered product solutions across the public and private sectors. Skilled in leveraging Python, SQL, BI tools and AI to generate data-driven insights that improve operational efficiency and drive market growth.

Experience

Prompt Engineer – Data Science, *Reworkdigital* 01/2026 – 06/2026
Juneau, AK

- Developed multi-step STEM prompts to evaluate long-context reasoning in LLMs.
- Compared AI-generated responses against verified GT solutions.
- Analyzed retrieval and reasoning failures.

Hackathon Judge, *BitHacks (Saket Creations)* Since 04/2026

- Evaluate 37 hackathon submissions focused on system utilities, developer tools, and OS-level applications.
- Assess functionality, innovation, code quality, and documentation.
- Review project relevance to themes and assign fair technical scores via Devpost.

Web3 Data Scientist, *Omniacs.DAO* 08/2024 – 01/2026
Iowa City, IA

- Analysed market trends, user behaviour metrics, and operational data to deliver actionable visual summaries and performance insights for the $IACS token.
- Published open-source visualisation content (Python, Manim, FFmpeg) on GitHub/YouTube.
- Participated in hackathons and built automated data workflows to monitor ecosystem KPIs and market performance.

Finance Domain Expert, *Mercor* 11/2024 – 05/2025

- Evaluated and stress-tested LLM capabilities on complex financial reasoning tasks, investment analysis, DCF modeling logic, and corporate finance queries.
- Audited AI-generated financial statements, calculations, and forecasts against verified ground-truth data, identifying edge-case hallucinations and mathematical errors.
- Authored comprehensive, multi-paragraph justification rationales explaining model performance, logical breakdowns, and adherence to strict financial standards.

AI Content & Text Annotato, *DataLabel Global* 05/2021 – 12/2022
Remotework

- Performed rigorous data annotation, text tagging, and sentiment classification for large-scale Natural Language Processing (NLP) datasets.
- Evaluated and ranked AI-generated responses based on accuracy, helpfulness, factuality, and tone safety to improve chatbot alignment.
- Identified model hallucinations, logical inconsistencies, and syntax errors, providing detailed qualitative rationales for each rating.

Education

BA in Business Administration and Service Management, Since 03/2026
Deggendorf Institute of Technology — European Campus Rottal-Inn, Germany Germany

- Coursework: Accounting & Finance; Business Administration; Math and Statistics.

BSc in Mathematics and Computer Science, 08/2016 – 05/2021
Taita Taveta University- Voi Main Campus, Kenya Kenya
- Coursework: Quantitative Analysis with Computing; GPA: 2.95 / 4.00

Skills

Business & Market Analysis
Stakeholder Discovery, Market Research, Target Industry Analysis, CRM Data Management (Salesforce), KPI Definition, Business Intelligence

AI
LLM app prototyping, agent workflows, evaluation

Soft Skills
Oral and Written Communication, Teamwork, Collaboration, Customer Service, Problem Solving

Data Analytics & Reporting
SQL, Python, Advanced Excel, Tableau, Power BI, ETL, MS Office

Communication & Sales Enabling
Presentation Design, Technical Documentation, Project Management (Slack and Asana), Atlassian Tools (Jira/Confluence), Zoom, Google Teams.

SELECTED PROJECTS

DeutschConnect-German Language Learning Platform. Since 03/2026
- The platform provides users with real-time grammatical corrections, an AI tutor, and connections with real users globally.

PolySignal - Polymarket Prediction Market Platfrom. 11/2025 – 03/2026
- Sentiment Analysis using NLP-based scoring of market narratives.
- Price Predictions: Statistical forecasts with confidence intervals
- Anomaly Detection and Unified Risk Score (URS)

Fashion Fusion — Agentic Retail Experience Prototype. 10/2025 – 01/2026
- An agent-style workflow to generate personalised fashion recommendations.
- Integrated LLM prompting with tool-style actions and iterative refinement.
- ***Won 1st Place at The AI Championship (DevPost).***

Profit and Loss Dashboard - (Tableau). 01/2024 – 02/2025
- Created an interactive dashboard for DrugStoreCo Company.
- The dashboard for management's decision-making.
